## About Me

I'm a student at Utah Valley University studying web design and development. I am passionate about art and story-telling and is learning numerous different softwares including Maya/Blender, Live2D Cubism, SketchUp, Visual Studio Code, and Adobe products like Photoshop, InDesign, Illustrator, and Premiere Pro. I love macro and nature photography and want to share my love of creatures big and small while fostering a deeper interest in the environment.

## My Product

I provide screensavers that are free to download for phones, tablets, laptops, and desktop computers. I've decided to provide these images for free (for now!) to share my creative work and love of nature and photography. To download a screensaver, go to

<http://madisontayler.com/screensavers.html>

--and just fill out the form to download any of my images to use a screensaver!
